ISHAAN SHAFFIR

Kelowna, BC • ishaanshaffir@gmail.com • linkedin.com/in/ishaan-shaffir • github.com/IshaanShaffir

SUMMARY

Computer Science fourth-year student at UBC Okanagan with hands-on experience in full stack and Android development. Skilled in designing and deploying scalable, cloud integrated systems using Flask, React, MySQL, and Kotlin. Passionate about clean code, SDLC, and solving real world problems through collaboration and innovation.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C#, Kotlin, C++
Frameworks & Tools: Flask (REST APIs, JWT Auth, ORM), React, Firebase (Auth, Firestore, Storage), Docker, Git, Tailwind, JSP

Cloud & DevOps: AWS (familiar), CI/CD, RESTful APIs, Agile
Development Concepts: OOP, SDLC, Debugging, Data Structures & Algorithms
Databases: MySQL, SQL Server, SQLite

PROFESSIONAL EXPERIENCE

Marketing & Data Management Intern — ThoughtsWin Systems, Surrey, BC **Sept–Dec 2023**

- Verified and standardized large client data sets to ensure accuracy and consistency for migration.
- Performed one-to-one file naming validation and metadata checks to maintain data integrity.
- Assisted in organizing and documenting structured datasets for internal reporting.
- Collaborated with the technical team to resolve data discrepancies and streamline validation processes.

Student Orientation Leader — UBC Okanagan **Aug-Sept 2025**

- Supported onboarding of 300+ new students, facilitating events and guiding academic transitions.
- Demonstrated leadership, communication, and teamwork in a high-responsibility campus role.

Retail Associate — Mountain Equipment Company(MEC) **June - Present 2025**

- Delivered excellent customer service and maintained product accuracy in fast-paced retail settings.
- Collaborated with team members to meet daily sales and operational goals.

PROJECTS

Exam Generation & Analysis System — Capstone Project

May - August 2025

Flask • React • MySQL • Tailwind • Python | GitHub: https://github.com/IshaanShaffir/ExamGen-Capstone

- Engineered a full-stack exam analysis system (Flask + React + MySQL) enabling automatic OMR result processing and analytics — reduced grading time by 70% and improved accuracy via data validation scripts.
- Designed REST APIs, implemented JWT authentication, and followed Agile CI/CD workflows.

ToolPool — Android App

Feb–Apr 2025

Java • Firebase • Firestore | GitHub: github.com/IshaanShaffir/ToolPool

- Built Android app for community tool sharing with authentication, listings, chat and image uploads.
- Integrated Firestore for real-time updates and optimized UI with XML layouts.

WeatherCast — Web Application

Sept–Dec 2024

Flask • SQLite • JavaScript • CSS| GitHub: github.com/IshaanShaffir/COSC-310-WeatherCast-WeatherWebApp

- Developed personalized weather dashboards using OpenWeather API and geolocation.
- Managed Agile sprints and collaborative GitHub workflow for feature delivery.

Online Shopping Website

Sept–Dec 2024

JSP • SQL Server • DigitalOcean | GitHub: github.com/IshaanShaffir/COSC-304-Project-OnlineShoppingWebsite

- Created e-commerce platform with admin dashboard, product management, and secure checkout.
- Deployed on cloud infrastructure and optimized queries for performance.

EDUCATION

Bachelor of Science in Computer Science **January 2023 - May 2027**
University of British Columbia, Okanagan

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Databases, HCI, AI & ML

CERTIFICATION

- NIIT Java Developer — Object-oriented design, algorithmic problem solving, and data structures.
